## Assignment of Data Mining and Warehousing Data

Weka is a collection of machine learning algorithms for data mining tasks. Also Weka is widely used for various data mining and machine learning applications, including data preprocessing, classification, regression, clustering, association rule mining, and more.

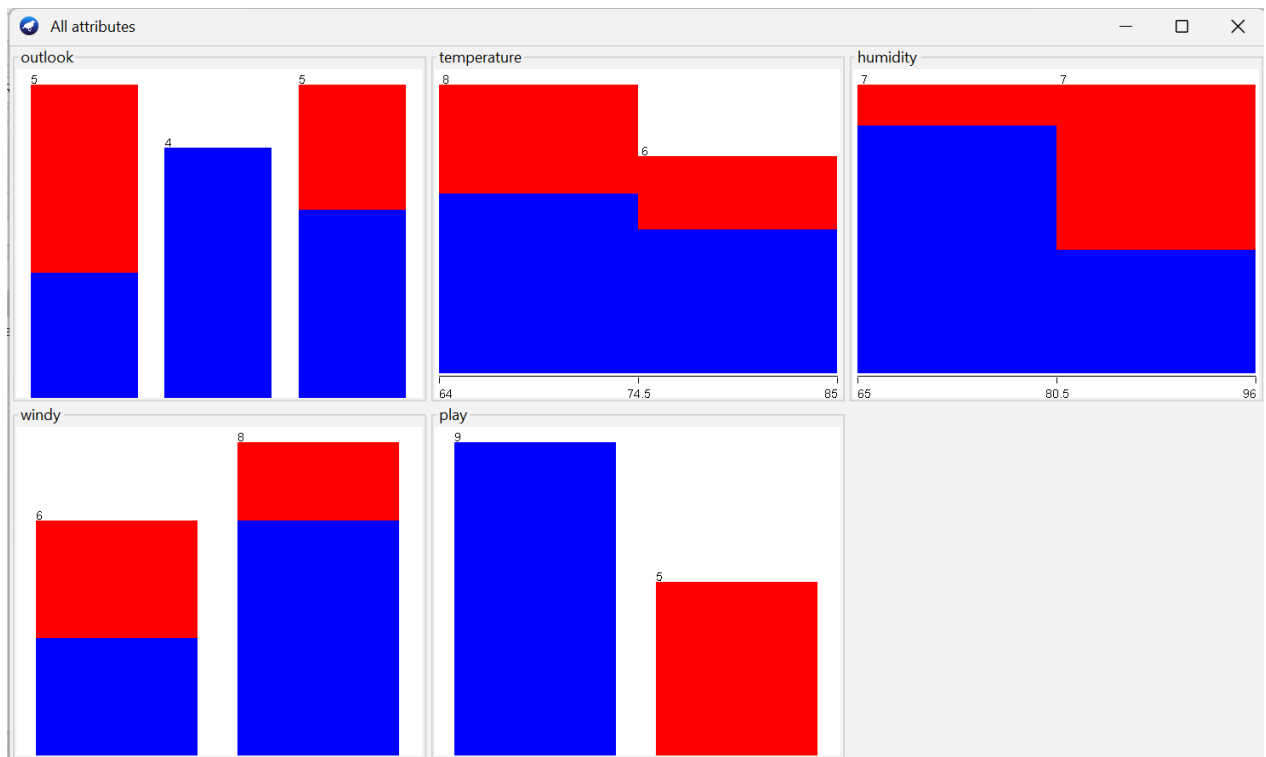

I started up weka, first I choose Explorer

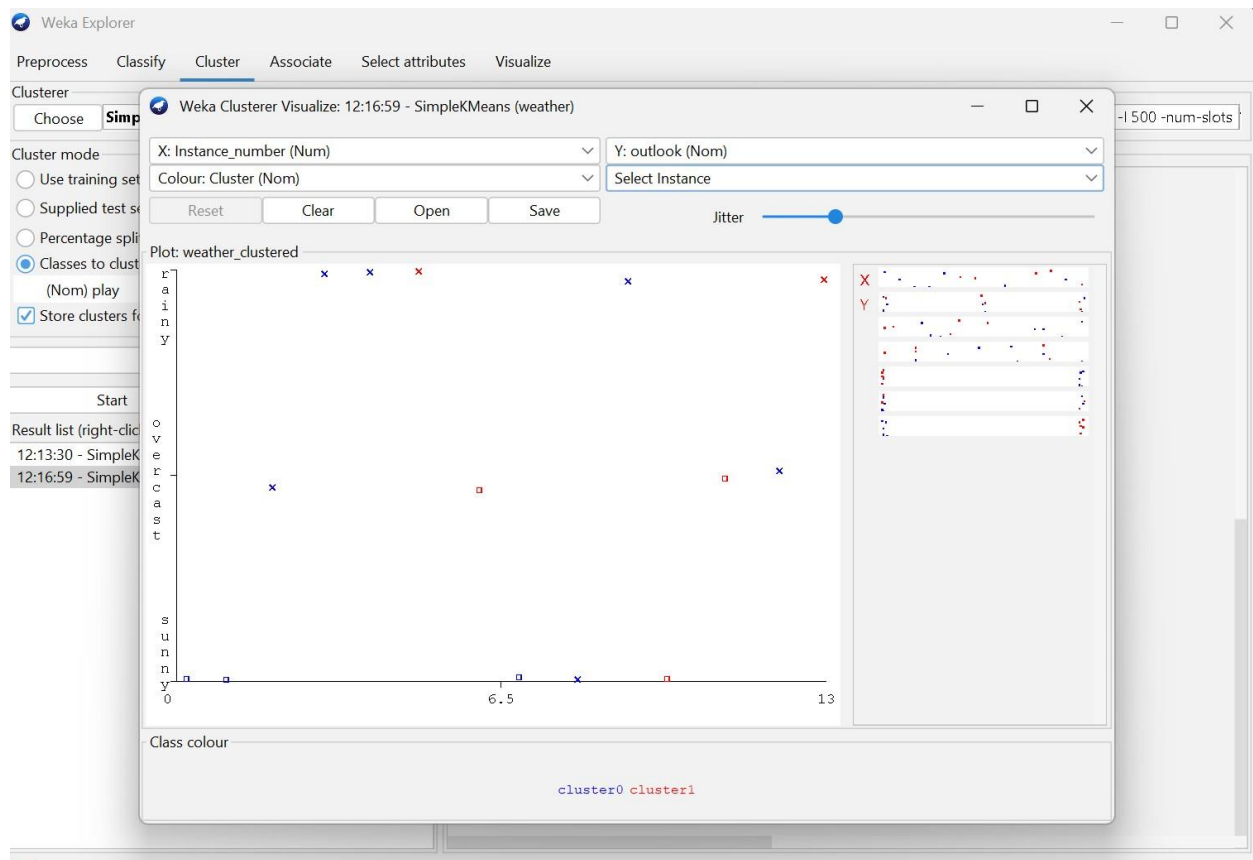

Preprocessing data

Include 5 attributes.

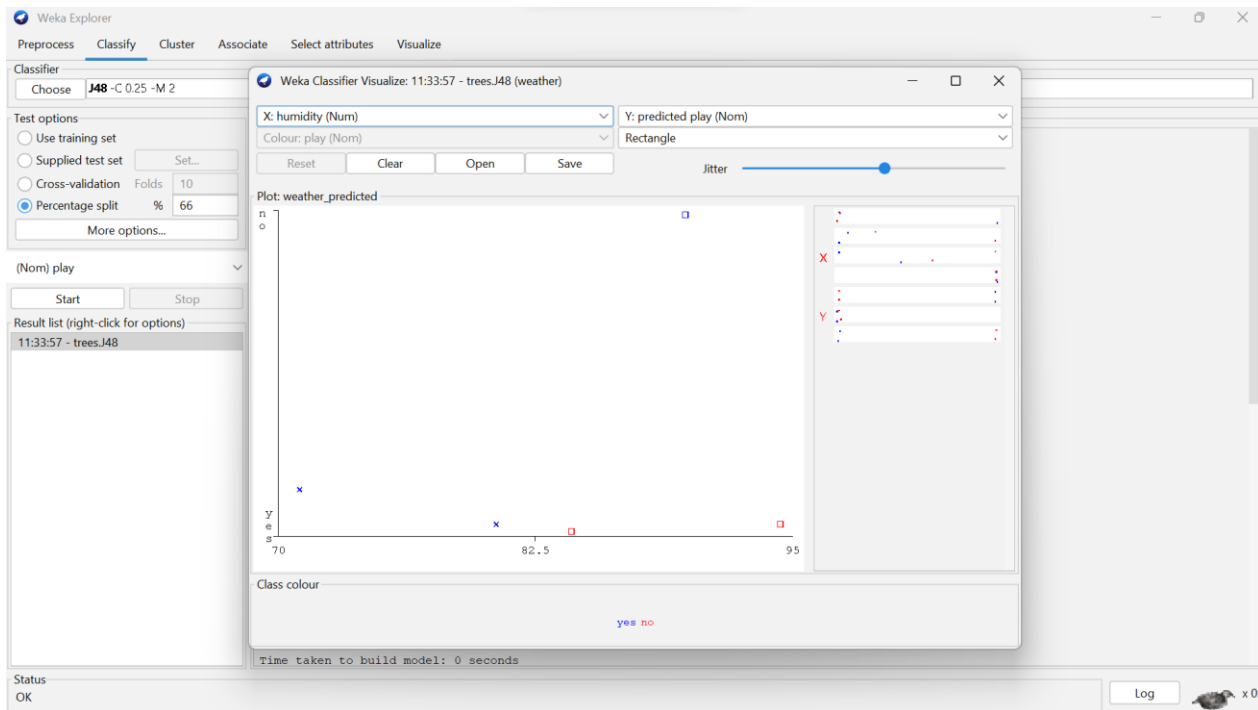

Clustering data:

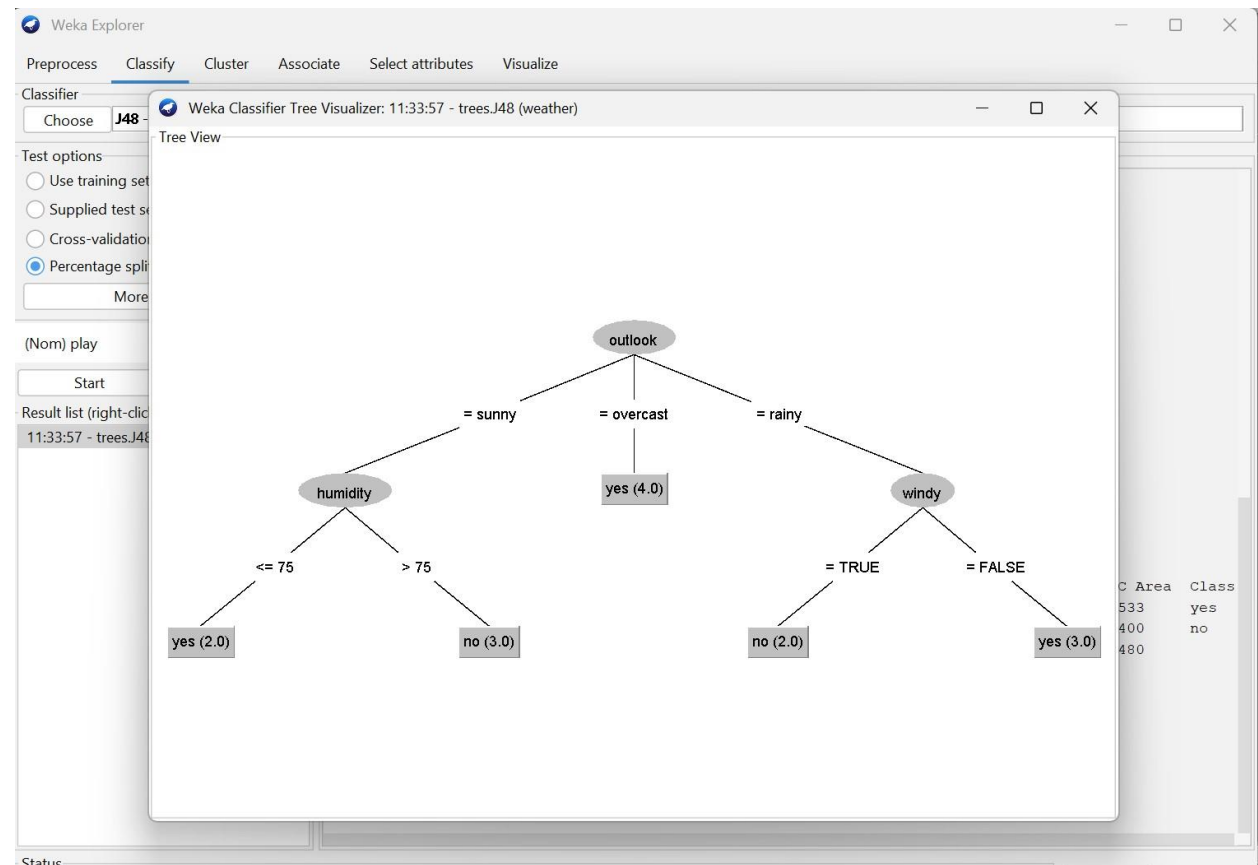

Building Classifiers:

## Classifier Visualizer-error

## Classifier Tree Visualizer.

I stopped by here because the following steps is not matching well.
